I am writing to invite you to attend the above symposium organised jointly by Cardiovascular Sciences, SGUL and the St George's Hospital Renal Department and very much hope that you will be able to find time in your busy schedule to join us at St George's on 11th March.

Cardiovascular complications are extremely common in patients with CKD and require early and rational treatment and prevention. Identifying and managing cardiovascular risk in patients with CKD represents one of the major challenges facing physicians today and for this very reason we have organised this timely and exciting symposium at St George's. The objectives of the symposium are simple and straightforward, and very important indeed. We aim at presenting a real picture of the problem represented by CKD in terms of cardiovascular risk, review the practical clinical tools available for the prevention and management of cardiovascular disease in CKD and discuss future therapeutic options.

We are fortunate enough to have an outstanding faculty addressing these issues and have given ample time on the programme to give you the opportunity to interact with our speakers and other members of the audience during the meeting. We have applied to the RCP for CME credits. We have attached a copy of the scientific programme for your interest.

We very much look forward to seeing you on 11 March at St George's and would be grateful if you could confirm your participation at your earliest convenience (please see below/attached).

With very best wishes,

Yours sincerely,

J C Kaski, MD, DM (Hons), DSc, FRCP, FESC, FACC
Professor of Cardiovascular Sciences and Hon Consultant Cardiologist

Dr D Banerjee, MD, FRCP
Consultant Nephrologist

'The following Pharmaceutical companies will have an exhibition stand at the meeting: Takeda UK Ltd'
